

Balaton Summer School in Physics, 2010

2010.04.27. | [HÍREK](#)

The Hungarian Association of Physics Students gladly presents the Balaton Summer School in Physics. The speciality of our Summer School is, that there will be four topics from physics simultaneously. Lectures will be held from Astroparticle physics, Energetics, Medical physics and Self-organization and networks every day.

The Summer School is international, the language of the lectures is English. In every session after a brief summary of the topic, lectures will focus on recent scientific results. The lecturers come from respected Hungarian research facilities and universities. All of them are well known researchers in their respective field.
