

Eötvös Loránd University Colloquium

Speaker: Peter Athron

Biography

Peter Athron is a Professor at Nanjing Normal University, working on many topics related to new physics in particle physics and cosmology including electroweak symmetry breaking, precision corrections, global fitting and cosmological phase transitions. Peter has obtained PhD at the University of Glasgow on “Aspects of electroweak symmetry breaking in physics beyond the standard model”. Since then he has worked as a post-doctoral research at the Technische Universität Dresden, the University of Adelaide and at Monash University, where he held an ARC Future Fellowship before joining Nanjing Normal University in 2021.
